THE PROBLEM

Mexico's Credit Gap is Massive

60%+ of Mexican adults have no formal credit history. Traditional banks reject most applications.

65M

Adults without formal credit access

70%

Loan rejection rate

~800 fintechs in Mexico, but most bolt AI onto legacy US/European architecture

No one has built a genuinely AI-native financial platform for Mexico's data environment

Cost per loan of \$15-\$25 makes serving thin-file customers unprofitable

AI-Native Platform — The ML

âœ… Our Architecture

- â– Alternative-data credit scoring (utility payments, mobile usage, remittance patterns)
- â– Real-time fraud detection with GNNs <50ms inference
- â– Dynamic risk pricing via reinforcement learning
- â– Sub-5-second credit decisions
- â– Continuous learning pipeline — improves with every loan cycle
- â– Explainable AI (SHAP) for Fintech Law 2.0 compliance

WHY AI-NATIVE

Why **AI-First** From Day One?

Existing fintechs retrofit AI onto legacy architecture. We built AI-first from the ground up. The difference is measurable.

-44.5%

Operational costs for AI-first fintechs (Finnovista 2026)

-54%

Fraud reduction (Finnovista 2026)

â 77% of Mexican fintechs already use AI — the market is AI-ready

â Only 27% are AI-first — massive whitespace for native AI player

â Fintech Law 2.0 (2025) requires explainable AI (RENIAI) — built-in compliance

â AI premium: 42% higher valuations for AI companies at seed (Carta 2025)

TECHNOLOGY

Deep Tech Stack

GNN Credit Scoring

Graph neural networks trained on alternative data
for thin-file populations

Real-Time Fraud Detection

Transformer-based models detect anomalies
<50ms

AI-native architecture: every layer designed for ML at scale. Automated retraining pipeline.

MARKET OPPORTUNITY

Mexico is **\$67.2B** by 2034

\$67.2B

Mexico fintech market by 2034 (CAGR 12.93%)

\$22

Current market size

â–¸ 2nd largest startup ecosystem in Latin America

â–¸ 795 local fintechs + 316 foreign players

â–¸ Fintech captured 60-70% of all VC deals in Mexico

â–¸ Mobile penetration >90% — more smartphones than bank accounts
